In the two years since I□ve started this site, I have made it my goal to publish the video tutorials I have been teaching in the classroom, as well as the workbook lessons that I use to supplement the physics.Â A lot of the work I□ve published has been at the request of reviewers, instructors, and others that were involved with the development of these materials.Â Some have expressed interest in my teaching, and have asked me to make video tutorials, and other have asked for workbooks.Â And I□ve started to make these materials readily available for free. In the two years since I□ve started this site, I have made it my goal to publish the video tutorials I have been teaching in the classroom, as well as the workbook lessons that I use to supplement the physics.Â A lot of the work I□ve published has been at the request of reviewers, instructors, and others that were involved with the development of these materials.Â Some have expressed interest in my teaching, and have asked me to make video tutorials, and other have asked for workbooks.Â And I□ve started to make these materials readily available for free. My mission is to promote the use of college as a gateway to the real world and to represent instructors and departments with content that is accurate and current.Â I want to help non-traditional students who are interested in exploring the world of work and academia, as well as giving aspiring secondary school teachers a chance to get a better idea of what they are getting themselves into.Â My focus in these lessons is to make teaching as efficient as possible, to make it as realistic as possible, and also to make it entertaining and engaging.Â Without delving too much into the philosophy of teaching, I use workbooks as a way to prepare students for the mathematical material that is covered in class.Â A workbook is e79caf774b
