On March 18, 2013, Microsoft released a C#.NET implementation for.NET Framework version 3.5 and above that supports integration with AutoCAD 2010 as well as earlier releases. In 2015, Autodesk announced integration with office.com, allowing AutoCAD users to use Autodesk 360 and Docs for AutoCAD users to view and edit Microsoft Word, Excel, PowerPoint, and OneNote files in

their native format. Python Python is another commonly used scripting language. Some of the popular scripting APIs include: AutoIt, created by developer Darin Morgan, was originally a commercial AutoLISP alternative for AutoCAD from 1997 until its renaming to AutoIT in 2002. Inscript, originally written by Renaud Modolo, is an AutoCAD 2.5 to AutoCAD 7.5 Automation tool that uses the.NET and COM interfaces to automate various functions within AutoCAD (Note: AutoCAD 2006 and later no longer support the.NET interface). Inscript is cross platform and runs on Windows, Linux and Mac OS X. AutoLisp, the scripting language from AutoCAD 1996 to AutoCAD 2003, was a low-level scripting language for AutoCAD that ran on 32-bit versions of AutoCAD. It was, in essence, a standalone scripting language which could be used to automate macros within AutoCAD. It was removed from AutoCAD 2003 and AutoCAD LT 2003, but was added back in to the Windows version of AutoCAD LT 2007 and AutoCAD 2008. It has been renamed to AutoLisp in 2011. QSpy, a Visual LISP-based scripting interface, has

been integrated into a number of applications to automate the visual interface. This allows users to automate the creation of views, workbenches, macros, new pages, shapes, etc. Visual Basic for Applications, popularly known as VBA, is an object-oriented programming language, which is supported by Microsoft Office and is present in Excel, Outlook, Access, Powerbuilder, Visual Basic, and most other Microsoft Windows-based applications. It is used for all types of automation except architectural. The Automation object provides a VBA-like API for Windows and is called ObjectARX in AutoCAD. R R is another statistical programming language, used for high-level scripting. It has become very popular within the CAD industry. The statistical programming language R can be
