### **S2 Recovery Tools For Microsoft Excel (formerly Excel Recovery) Crack+**

S2 Recovery Tools for Microsoft Excel, formerly Excel Recovery, is designed to repair corrupt Microsoft Excel files. When a Microsoft Excel file is damaged, its contents may become unreadable. This results in problems like not being able to read entire rows or to open a particular sheet. The consequences of such an error may be worse depending on the damage that it's incurred, but Excel Recovery will help you deal with the problems even if they reach a dreadful level. To start with, you can try to recover Excel file with its own utilities. Excel Recovery will search all the files on your computer in order to find a functional copy. If it locates only a backup copy, you have to restore it from the backup as this is the most likely cause of the damage. Alternatively, you may launch Excel Recovery in "Safe Mode", which would basically force the application to ignore anything that is doubtful. S2 Recovery Tools for Microsoft Excel has a pretty clean and simple interface with just three options – "File Repair, Repair in Safe Mode, and View Metadata". The first option will take all the work out of your hands and will attempt to fix the file by making an attempt to recover its contents. The software will search for all the files with the same name on your computer, extract them, and check their content for the files that it's missing. The tool will also check whether or not the damaged file is in Backup folder. The "Safe Mode" option in S2 Recovery Tools for Microsoft Excel is actually a shortcut to the advanced options. To be precise, the option will search your entire computer for the damaged files and will check if they're in the Backup folder. The third option enables you to check the file's metadata, which involves looking at all the headers and footers. The program has a built-in search function for this, which means that it will check whether or not there are some missing values in the header or footer section. After you select the option to repair the Excel file with the software, there will be a pop-up window where you have to answer questions like "Is Excel Recovery able to restore this file?", "How many changes does the file need to be fixed?" and "Would you like to save the file to the folder [with a specified path]?". When you click the "Start repair" button,
