Create beautiful animated buttons with just a few clicks. Make them rotate, flip, scale and drop in a few seconds. Web Buttons Screenshots: System Requirements: OS: Windows 7/Vista, Windows 8/8.1/10 Windows: All Editions 4GB RAM 2GB Graphics: DirectX: Version 9.0 DirectX: Version 8.0 Windows Display Driver: Version 10.0.18362 How to uninstall Web Buttons? 1. Disconnect from the internet. 2. Uninstall the program by running it from the Control Panel 3. Carefully read the Uninstallation Guide that comes with your program 4. Delete files that belong to the program. They may be located in the Temp folder. 5. Display the Uninstaller window, and deselect the program you wish to remove. 6. Press Uninstall.Q: Use a grayscale picture I'm using this to stretch out a png to make it have the same proportions as a target image: Canvas(img_2).stretch(img_2.shape[1], img_2.shape[0]) But how can I make it so that it's completely grayscale and only has shades of gray? I tried some things with converting to grayscale and saving using PIL, but I couldn't get that to work with the code I had. I also saw that i can use the grayscale example of matplotlib, but that's not what I'm looking to do. Any ideas? A: Here's a simple custom PIL plugin for doing that. It's a fairly-naïve implementation, using a mask to turn black pixels on to white, and the reverse. from PIL import Image class Pixelate(object): def __init__(self, im): if not isinstance(im, Image.Image): raise TypeError('im must be an Image object') self.im = im self.mask = im.load() def process(self, x, y): if (x, y)

Web Buttons is a simple yet powerful tool designed to make a great number of custom web buttons without requiring you to understand a single line of code. The app offers a clean interface and shows great results when it comes to making buttons that look attractive and have a nicely high-quality look. With Web Buttons you can: - Create a premium button with a custom image and color; - Upload and/or download a file from the internet; - Make a lead to a custom website; - Make a button for your help file; - Make a button for your download; - Make a button for your membership; - Make a button for your upcoming event; - Make a button for your cart; - Make a feedback button; - Make a button for your FAQs; - Make a button with a custom description; - Make a button with a custom image; - Make a button with a custom icon; - Make a button for Twitter; - Make a button for Facebook; - Make a button for YouTube; - Make a button with an URL; - Make a button for your website; - Make a button for Google Maps; - Make a button for an image; - Make a button for WordPress; - Make a button for Windows Phone; - Make a button for iPhone; - Make a button for Android; - Make a button for BlackBerry; - Make a button for Windows; - Make a button for your blog; - Make a button for RSS. The layout of the app is simple enough to understand, which allows the user to get to know the program much quicker. The app has all the needed customization features and is easy to use. Advanced options panel Apart from the general options there is also an advanced options panel, a detailed help file and a video tutorial. The latter can be accessed by going to the option "help" which then displays the video tutorial. Aside from the basic features, the advanced options panel let you customize colors, icons, images, text, number of buttons, position, and shipping address. Edit the text, background, font, alignment, shadow and glow tints, and position In the upper right hand corner of the preview window there is a little gear icon. From it you can change the properties of the text, background, font, alignment, shadow and glow tints, and position. The app allows you to change the 09e8f5149f
