System Manager for Windows Vista
Mobility Manager for Microsoft
Exchange for Windows Vista is
intended to be a unified and
centralized management solution
to help administrators manage
all the mobile technologies in
their organization. It provides
a unified user interface to
control and monitor IT-enabled
mobile phones, personal digital
assistants (PDAs), and laptops
in one convenient place.
Exchange System Manager for
Windows Vista is made up of
multiple modules that make it
easy to configure, manage, and
monitor the devices. The control
module allows you to control the
Exchange System Manager for
Windows Vista server to have
total control over all the
Microsoft Exchange Server 2010
server components and clients
for your organization. The

control module provides an easy one-click remote access over one of the computers running the Exchange System Manager for Windows Vista. The control module also enables you to configure mobile devices and servers to have full access to the resources on the server. The configuration module provides basic configuration utilities for administrators to set/update various device settings such as which server to use when sharing email, mobile email settings, SMS settings, dial plan settings, configuration settings for mobile phones, and configuration settings for clients. The monitoring module shows graphs of device activity and configuration settings to help administrators monitor all these functions. In addition, the module has a comparison module that compares mobile

device usage and configuration settings over a period of time. Please refer to the following document for an introduction to some of the features of the Mobility Manager for Microsoft Exchange for Windows Vista: Mobility Manager for Microsoft Exchange for Windows Vista Feature Overview. Mobility Manager for Microsoft Exchange for Windows Vista Description: Exchange System Manager for Windows Vista is the first and only peer-to-peer (P2P) file sharing application that seamlessly integrates Exchange Server 2010 with Windows Vista. Built for Microsoft Exchange Server 2010, the Exchange System Manager for Windows Vista provides a powerful P2P file sharing client and file storage management tools.
