Requirements: .NET Framework 4, 4.5, or 4.5.2 · Visual Studio 2012 SP1 FBQuick is a small software application developed specifically for helping you get instant notifications on your desktop for various Facebook events. The utility is able to automatically monitor your account and notify you in case you receive new messages or you are tagged in a photo. It can be installed on all Windows versions out there. Unobtrusive running mode You can find FBQuick running quietly in the system tray without disturbing your activity. The program's functions and configuration settings can be quickly accessed via the system tray. Although there's no support for a help manual, you can easily get an idea about the utility works because the dedicated parameters look intuitive. Monitor your Facebook account FBQuick gives you the possibility to automatically monitor your Facebook account at a preset time interval, namely 1, 5, 10, or 15 minutes. In addition, you can make the application check for messages, wall posts, pokes, tagged photos, friend requests, shares, group invites, as well as event invites. Popup notifications are automatically displayed on your desktop each time you get a new notification. The utility offers you the freedom to define the time used for displaying the popup message by choosing between several preset time values, namely 5, 10, 15, 30, 45, or 60 seconds. Other important configuration settings worth being mentioned enable you to run the app at Windows startup, check out the last five notifications, as well as perform a manual check of all Facebook notifications or just a single one. FBQuick is not a resource hog so you do not have to worry that it eats up CPU and memory resources. The overall performance of the computer is not hampered. Final remarks To sum things up, FBQuick has to offer nothing more than a simple software solution for helping you stay up-to-date with the latest Facebook notifications from your account without having to manually check your web browser. It can be configured by rookies and professionals alike. What's New in the FBQuick?

FBQuick is a useful, easy-to-use, small and unobtrusive application designed specifically for helping you get instant notification about Facebook events. Facebook Events is a desktop utility that enables you to view all the upcoming events on your Facebook. The program organizes the Facebook events into categories such as "Events you are interested in", "Personal events", "Local events", "One day events", "Mentions", and "All events". Other features of this software include the event invitation, the ability to filter out events. Even though the program can be used on both Windows XP and Windows 7, I am giving a detailed review on Windows 7 only. One of the main reasons is that Facebook Events does not have a dynamic interface in Windows 7. Therefore, this review is made on Windows XP solely. Installing Facebook Events When you start the download, a file of almost 3.4 Mb will be launched. The utility does not require installation and it runs directly from the file. The installation starts automatically once the application starts. After the setup, the program will launch a welcome screen that will ask you to set up the Facebook password. There is no need to enter the password again. The next step is to decide whether the program will be

launched at startup. It's the third step according to the tutorial. You can also decide not to be notified when it turns off or it is restarted. Features: Single-click event invitation. Category grouping and filtering. Syncing with calendars. Event location. Event invitation. Event commenting. All other features can be found by clicking the "Help" button. Facebook Events has a small set of help manual. Overall Facebook Events is a very simple-to-use program. The only thing that could be improved is the lack of a mobile version of this application. Facebook Events Review: Find Events on Facebook This is the most important feature of this product. Facebook Events allows you to search for events, check when they will start and even be invited to them. Facebook Notes is a program designed for recording short notes or quotes on your Facebook. The notes appear as snapshots. The main features of this application include: Short status updates from your friends, such as when they start a new game, when they receive an award, etc. The ability to add images and add the
