To increase the reliability of decoding the transmitted data, the wireless transmitter adds cyclic redundancy check (CRC) bits to the data, and transmits the coded data and the CRC bits through the radio channel. When a receiver receives the data and CRC bits through the channel, the receiver attempts to decode the received data bits and CRC bits. However, if the CRC bits are not properly received, then the receiver cannot properly decode the data bits. Therefore, a receiver needs to detect the CRC bits of the received data and then decode the received data bits.Q: AJAX call failing due to error in my config file? Shadows are darker and less grey. Shadows no longer extend past the bounds of the world in all directions. Town borders should not be visible inside villages. We have removed cold art.

## Polish

Polish diction (linguistic dialect) and spelling has been improved. Team names now appear on the Join menu etc. A warning message now appears when players try to play over the live limit.

## Ascii text label

## Replay play speed

Replay speed has been increased to 125% and 250% in multi players.

Overall game speed (animation and sound) has been increased to 125% in 60 fps games. Movement ability will be slower.

## We have more space

We have more space to move the world from village to village.

## Highlighting

Highlighting of players has been made much more minimal and precise.

## Mics

Mics has been tuned over the winter. Mics now are hardly audible when you are walking around.

## AI

Anti-cheat has been greatly improved. The A.I no longer ransacks/stash boxes to build a bigger village and gets rid of small parties. The AI will keep moving and scouring the area for a bigger and better place to live. In doing so, the AI will now build larger party boards, an improvement to their own efficiency over fire users.

## LOD vs accuracy

We have made some LOD improvements, but we have also changed the general way of rendering players. Currently our main LOD level of 8000x8000 caps at a 0.05mm accuracy but if you zoom out, you will see that the "accuracy" is 0.1mm as
