-Overview: "Read More" The game will tell the story of a young mage on a journey as he rises to become the leader of a band of adventurers. While on his journey, the player will meet many characters and make a variety of choices based on the scenario and different paths that the character can take. By making choices at various points in time, the player can influence the entire story and create a different ending. This is what we call "Read More" -Play Style: "Street Fighter" While the game does not take the path of action RPGs, you will have to actively play while having to make choices. The game strongly emphasizes the principle of "First Person View". -Multiplayer Online Game: "Play With Others" The game is a multiplayer online game, and the objective of each character is to seek out other players and challenge them. The game allows online chatting through a chat function. In addition, through a newly added online function, characters can trade information and battle with other players. -Features: "Buy and Sell" Classes, items, and weapons can be purchased in the game. You can change your classes and items via the shop. By purchasing these items, you can shape your character to your liking. Unlike other games, you can change your items, equip, and change classes during combat. When you change your weapons in battle, your weapon's power and effectiveness will change. You can also change weapons and different classes during a battle in single-player mode. -Game Content: "Puzzles and Missions" The game has numerous puzzles and missions such as "archeological excavations," "team quests," "oppress monster(s)" and "explore unexplored areas." You can earn rewards that will benefit the entire party as a result of completing these missions. -Action System: "Street Fighter" In addition to "Read More", there is an action system that provides a variety of ways to cause events to occur and action elements to be activated. You can change character class during battle to complete combat actions that you want to use. -Also includes: "Audio and Music"
