The mechanisms of these effects are, however, unknown. The goal of this research is to determine the effects of PCP on the brain, and to identify the neuronal mechanisms that mediate acute and long-lasting effects of PCP. PCP causes long-lasting effects of PCP. PCP causes long-lasting effects of PCP. PCP causes long-lasting changes in neuronal number, protein, and mRNA concentrations in rat hippocampal and temporal cortex. These changes are due to enhanced synthesis, accelerated degradation, or both. PCP produces long-lasting changes in the distribution of fast axonal transport of proteins within vesicular organelles. The hypothesis that PCP alters the distribution of proteins to the growth cone, or by altering the effects of PCP on the distribution of proteins in rat hippocampal and temporal cortex; 3) determining the effects of PCP on the distribution of fast anterograde axonal transport in the ransport of proteins in rat hippocampal and temporal cortex; 3) determining the effects of PCP on the distribution of large and small organelles associated with slow axonal transport.
