There are 945 peaks in the Scottish Highlands, more than anywhere else in the world. Among them are the lofty mountains, the unfathomable highlands, and the long stretches of wild coast. They're all waiting for you to discover their mysteries. This is your tale. Your Guide The Journey Moira McKeown has never been to the sea. Fifteen years have passed since her Mum has died and everything has fallen into place. Moira lives with her Auntie and cousins in a house by the edge of the Scottish Highlands. It's been a long time since she's seen the sea. When an uncle asks her to go to the coast for the solstice, she jumps at the chance. It's not like she has anywhere else to go. She'll make her way on foot from one tiny village to another, clambering over stony hills and portaging down lakes. Finding the way will be hard, but she will have music, faith, and some mighty fine companions. The Journey promises to be full of music and mystery, and the story of a girl who set out to find a way across the untamed lands of the Highlands. Each of us has a tale to tell. And so do these mountains. Risks and challenges The game is a test of exploration, trailblazing, and climbing. It's an adventure game, so it also means there are real risks and challenges in the story and in Moira's journey. The only way to survive and complete Moira's journey is to climb, slide, and jump over the wild landscape of the Scottish Highlands. The game has no in-app purchases, no purchases required to be successful. What is the exact nature of the challenges that Moira will need to overcome? And how is this adventure game different from other indie games? A: @jarlh Why do you sound

---

so much like the poor bloody Brendan himself? What is it, this man-to-man thing? It's his job, surely? Anyway, the game is basically a point-and-click adventure game, but with a bit more to it. As I understand it, the '3D' aspect is more the result of an entirely different camera system. You get a viewpoint on a level that's rotated as you

## **Gene Rain:Wind Tower Features Key:**

## **What's new in Gene Rain:Wind Tower:**

**(2007) GameSpot: A 3D game whiz and automotive technology geek, Langston buys a console and camera for his home workshop to research U.S. emissions laws. It seems like a simple enough premise, a man trying to hack a means of testing the facts that are readily available before he buys a car. He ends up a little too deeply enmeshed in the details of the tests themselves to explain to those around him why he has done what he has done. You're in the stand, where the car is testing bad. You know you're looking at a bad engine. You're looking at a failed injector. You're thinking, what's the worst that could happen? Should I do anything? You put your hand in your jacket pocket and your phone rings. It's your friend. He's outside in his truck and he wants you to send this image. Click the photo and send it to me. There. It's the engine you inspected. It's 5:45. Time to go to work. I asked fellow Gaming Scout Brad Shoemaker for some GameSpot inklings, and it turns out, he's not the only one around here who's bored at home. What's the dumbest thing you've done with a game console? Gaming I put together a 3D car racing game with a friend at college. We mostly used RPG Maker but there was only one other RPG Maker engine with working online play. It was really primitive, but worked fine except when it wanted to load the map. So when I was getting ready to close out my final year, we made a little stopgap version of the game that used a completely in-house engine we'd written in XML instead of making a different player. After the college game engine was no longer needed for our purposes, we figured we'd just delete the project using XML and keep it on github for inspiration for a final project. However, by**

**then, we were over the worst of the semester crunch. By the end of our project, we'd cleared out all of our spare time and were dragging on our last day of school. While trying to clean up the files from our old project, we found a file for a new game in it - maps. So I started sketching up**
