Order of Dawn No CD Patch by GF.Effect of the temperature on the dynamic characteristics of a beam-shaped coupled microcantilever. In this paper the free oscillations of a beam-shaped coupled microcantilever have been experimentally investigated at various temperatures ranging from room temperature (298 K) to high temperature (700 K) by using optical interferometry. The influences of temperature on the mechanical properties, dynamic response and resonance frequencies of the microcantilever have been presented and a unified model has been proposed to describe the effect of temperature on the microcantilever. The experimental results demonstrate that the single-mode resonance frequency and quality factor of the beam-shaped coupled microcantilever decrease at high temperature. For comparison purposes, the thermal effect of a coupled microbeam has been investigated, as well. It is demonstrated that the damping of the beam-shaped microcantilever is much lower than that of the coupled microbeam. The temperature dependence of the damping of the beam-shaped microcantilever is nearly the same with that of the coupled microbeam.

Can't get Android spinner to refresh in a ViewPager I have a ViewPager with an adapter, and I have a spinner on the layout. The spinner has an onClicklistener that changes a SQLite database's string field (product\_text). It works
