Where can I buy AutoCAD? There are two main types of license you can buy from Autodesk: A perpetual license entitles you to use the software for an indefinite period as long as you comply with the terms of the license. A non-perpetual license entitles you to use the software for a specified period of time, and you're not allowed to renew the license or use the software for another period of time. You must destroy your license and take it back to Autodesk to have it reissued. For most users, the lifetime license cost is the only option. However, there are some exceptions: If you own the application on a perpetual license, you can extend the license to another computer or device. If you own the application on a non-perpetual license, you can extend the license to another computer or device. You can extend the license for up to 12 months for a single person or up to 24 months for an organization with one permanent user and one or more temporary users. After 12 months, you need to renew your license if you want to continue using AutoCAD. How do I renew a perpetual license for AutoCAD? When you buy a perpetual license for AutoCAD, you're granted a limited right to use the software for the defined period of time. You can renew your license by contacting Autodesk sales and support. They can renew your license for you, or you can contact Autodesk customer support if you need assistance with the renewal process. In the rare case where your license expires due to a bug in the software or your business model changes, you can request an upgrade of your license.
