to Restricted Folders on My Android Lollipop
Device (With Root) I was using the app
"Rescatux" with my rooted Android Lollipop

device before I upgraded to Android Lollipop. I've been using it to navigate the file system and have had no problems. The idea being I could have my removable media, etc, "out of the way" while doing Android development. I'm a novice android developer, though, so I didn't understand how to handle the "storage" part of my removable media (e.g. music, etc, backed by a Kingston 16GB microSDHC card). After upgrading to Android Lollipop, I can't access some of the folders on my SD card anymore. (e.g. "my music" folder) I can navigate fine in the rest of the file system though. What seems to be happening is that the device no longer has access to the SD card. (e.g. it asks me for the root password every time I try to access it) I'm fairly sure I wasn't navigating out of the way of the SD card at this point. I'd like to regain access to it. What can I do? A: Are you sure your

SD card is compatible with Lollipop? In addition, You need to do some reconfiguration in Lollipop. Here's what I did: Tap the power button twice to stop the process in Android. Then, turn your phone on, but don't turn it on yet. Open Settings -> Security and then enable USB debugging. After that, open Terminal and type: adb devices You will see a list of phones and your phone should be in the list. If your phone isn't in the list, you have to use a different USB cable. If your phone isn't there, try to get your friend to plug in your phone with their own USB cable. Then you can use the phone as normal.
