This is a great product. I needed some drum sounds for a song i am writing, and i came across this product through YouTube. i was attracted by the demos and also liked the price, and how easy it was to download and use. So i bought it and the demo was very informative. But for me, the big thing about the demo is that the demo was not just drum loops, but there was also a MIDI file with the drum beats and synth beats also. And this really gave me a great start on the project, i used some of the drum loops and MIDI beats and then wrote my own drum beats and instrumentals. The real thing about this product is that the pre-recorded drum beats were very smooth and professional. You could definitely create a song with this product, so all in all, this product helped me in several ways. Firstly, it was a trial version, so i would not lose anything, because of the fact that i bought the product. And also the price was very good, because it was a small investment in my mind. I was stuck on drums and percussion for a year, and i wasnt finding much. Then i stumbled upon one of the developers on these forums and he recommended Addictive Drums 2. It was like finally, drum sounds, and a MIDI pack at a reasonable price. After using and buying this product, my life has changed. Flatpack Analogik Drums VST/AU plugin is a 2-in-1 drum modeling/VST instrument. It is designed to be used with TURNSTONE patches. Use the 3 adjustable parameter knobs ("Volume", "Timbre" and "Dynamics") to personalize your drum sound. Or go straight to the 100 performance presets and choose from settings such as "Snare", "kick" and "tom".
