MATE Information Center for Element OS 0.8 EAP (Element OS v3) Hello!This release is a small update to MATE Information Center to fix a small bug.It only affects people who have not updated to the new MATE version for Element 0.5 release.Some error reported to me in Google groups:Element OS 0.4.0 -- MATE Information Center.Element OS 0.5a2 -- MATE Information Center.Element OS 0.5c1 -- MATE Information Center.All of the crashes I get from MATE Information Center always happen while I am restoring my computer (MATE or Ubuntu). The problem is that it is supposed to go to 100% and then freeze.If you try this, be sure to have a good troubleshooting guide, a dual core CPU, and a plenty of hard drive space!I have reported the problem to the Element developers, but I do not know if they are fixing it or not.At least, they are not responding to me on the Google Group.
