# Descargar Microsoft Project 98

TS Project supports MS Project versions 5.0 and greater. MS Project compatibility is one of our most important values, so TS Project will always be MS Project compatible. Currently the only distribution of TS Project is the Windows version. (Currently there is no available Linux package, you can contact us for a volunteer job if you are interested.) MSDosBox Project Management Software is easy to use and full of great features. MSDosBox Project Management Software is a fully functional free online version of MS Project, which is released under the GNU GPL license. Microsoft Project is an online project management application that lets you organize tasks, milestones, and tracks on a calendar. Microsoft Project allows team members and participants on a single network share to work on a project simultaneously in real time. It uses shared documents as project management tools and allows project participants to view and comment on changes. Microsoft Project is designed to manage any type of project including simple projects and lengthy projects. The main difference is for simple projects, the user has to set the time, cost, and duration for every task. However, for lengthy projects, the main features are completely set up so the user only has to provide the general project summary. A task management tool that enables you to do project management effectively. This tool provides you with all the features which you need to manage tasks. While adding your tasks or for editing/adding a new task, you can do it all in a new tab. When you are adding the task, you can just assign a due date, start date and duration and even edit the task. When you are done with a particular task, you can set it due to be done. You can also review your tasks at any time. You can also create a task dependencies and create a task flow. You can create sub tasks and task subtasks. You can also define access levels for tasks and you can delete a task when the task is completed.
