This is a tutorial on how you can extract and use the first version of the final patch and how to use it without any issues: Extract and get rid of DayZ world game startup crash, world can not be saved. I was updating, when I started installing the patch my window wouldn't close, it crashed and I got the message world can not be saved. I uninstalled the mod and rebooted and I can now access the game. There are still some problems with the game but it's playable now. If you're following this step by step, you're good to go. I'm actually pretty bad with tech support and getting information out of people. They are only very good for the basics. They got hooked on an automatic fix from somewhere, and I'm sure one of those tech guys will have a fix for you. I like to think the guy who called me was good, so thanks to him. If you do get into any problems that you need help with, I do offer mods and mods for mods if you can find them. I'd love to get free mods and mods for mods in exchange for some of the time I put into this game to take care of the mods that you want. I'm one of the only people that have modded the game to my liking and others wouldn't do such a thing because it's not possible. Installation took several hours but once complete I was able to download the mod by following this guide (tutorial) to the end. I have uninstalled the mod and I'm happy with my skins, however the mod works flawlessly like it was advertised. Would recommend to other players and players that are interested to create their own skins or even their own animals. Its the only mod that I have used that works without any issues. This is the only mod that I can think of that installs itself without any issues. Merely a disclaimer since it has very few issues. I've played a lot of MMO games and although I don't wish to get to pick on anyone in particular, I'd say that some of the guys that get upset at players that make fun of them on purpose and say they are in some sort of league, have the most incompetence when it comes to these games. 5ec8ef588b
