the objective is also where close combat starts to lose its way. most of these missions feel like glorified tutorials, and it's hard to avoid this feeling unless you slog through them. most of the objectives are rather trivial, and require you to either kill a certain number of enemy units or destroy a certain number of buildings in a specific order. if you do everything correctly you'll be rewarded with cash, but most of these missions are a walk in the park. for the most part, close combat 5 is fun, but there are a few drawbacks. the game is rather slow. the units move as though they're in slow motion. that's not necessarily a bad thing, but i was starting to notice it more and more as the game went on. units move slowly and you'll sometimes have to wait for the ai to complete its turn before they can move. this can lead to some rather boring moments, and make you wish you had a faster computer. on the plus side, close combat is a strategy game, so it's not really made for a one-button shooter, and that's why the game feels like it has such a long loading time. speaking of slow, close combat 5 is unforgiving. if you don't do a great job with your units, you'll have to start all over from the beginning. if a particular unit isn't behaving as expected, the ai will slowly chew you up in a firefight. of course, the enemy ai is equally as unforgiving, and it can be very difficult to tell the difference between a good and bad ai performance. close combat has a knack for getting the better of you if you're not careful. the game supports both of the major combat flight sim

platforms of the time, making it perfect for all aircraft lovers. the game has an ace mode, which puts you in the cockpit of the opposition and controls them for you, giving you to try and beat your own score. it's a fun way to try and beat the high scores and if you want to play with the most popular airplanes, then you'll be happy with the game.
