Empty Folder Nuker With License Code

----- Empty Folder Nuker is a small utility designed to help you quickly clear your files from your hard drive. The program allows you to easily delete empty folders that clutter the interface of your operating system. This is a portable product, so installation is not necessary. All you have to do is place Empty Folder Nuker on a removable device and run the executable file on any computer. In other words, if you, for example, input your main volume as the base folder, all the folders with empty contents (including empty subfolders) will be deleted from your system. This way, you will have an easier time searching for a file in an unknown location on your hard drive (since you can disregard empty folders). Furthermore, you can add Empty Folder Nuker to the Explorer context menu, so accessing it is easily done. The program uses a very low amount of system resources and performs a scanning task in a reasonable amount of time (according to the size of the base directory). Once the scanning is complete, you can specify the empty folders you want to delete, optionally check all of them and enable the tool to exit after deletion has been successful. Removing the files takes a short while (they are not permanently deleted, but moved to the Recycle Bin). Obviously, not all folders can be removed by Empty Folder Nuker, since some of them are system files which require administrator privileges. Otherwise, Empty Folder Nuker gets its job done, so we strongly recommend it to all users, whether they are experienced or not. 1.0.0.2 Size: 27.57 MB
