Wall Splatter is an app that allows you to add a new background every week to your PC. You simply select the topic that you prefer, select a wall from Unsplash and then choose the setting you prefer. That's all. Rating: 5 / 5 Download Size: 24.2MB Installs: 1,000+ Version: 1.2.0 File size: 24.2MB Requirement: 4.0 and up Wall Splatter - Features: Straightforward Unsplash client To get this app on your PC, you first need to access Microsoft Store, so the latest Windows flavor needs to be running on your device. It needs to be mentioned that the pics provided by this utility come from Unsplash and you can choose the categories you are most interested in, such as nature, people, architecture, interiors, fashion, travel, family, history, animals, bokeh and many more. A few customization options Before you start looking for the ideal wallpaper, you can specify the topic you prefer, as well as the picture orientation - landscape, portrait or square. Once you have found the wallpaper you like best, you have several options: you can download it to your PC as a JPEG file, you can set it as desktop background or you can apply it as your lock screen image. No automated wallpaper rotation However, one of the biggest flaws of Wall Splatter is that you cannot schedule it to automatically switch the desktop background according to your criteria. In other words, you need to manually access this application, look for a suitable Unsplash image, then apply it, instead of having this entire process simplified and automated. To wrap it up In a nutshell, Wall Splatter can help you add a nice touch to your desktop, assuming you are willing to spend time manually looking for the new wallpaper and applying it. It does not require any expert skills, nor does it take up a lot of your computer's resources, so you should be able to enjoy its feature-set without any errors or glitches, even if you are not a tech-savvy user.
