

Position the cursor to the next line (Press this to move the cursor to the end of the current line) & E: Edit the current line (Press this to edit the current line) & Left to Right Arrow: & C: Cut the current line (Press this to cut the current line) & R: Re-source the file (Press this to re-source the file) & F: Find and replace the current line (Press this to find and replace the current line) & Up Arrow: & T: Move the cursor up one line & Down Arrow: & F: Move the cursor down one line & Page Up: & N: Move the cursor to the beginning of the file & Page Down: & P: Move the cursor to the end of the file Macros are executed in the order in which they are called. A macro can have multiple arguments. & It is followed by the &'s closing delimiter & This is followed by the special key & The arguments are separated by semicolons. & There must be a space between the macro name and the first argument. & No space is needed between arguments. & If more than one argument is used, there must be a space between them. & If macro arguments are passed to the macro, they are delimited by commas. The macro name must have the special case (&) for handling keyboard shortcuts REMOTE_URL The absolute URL of the remote file to be loaded (remote path could be relative) & The URL may be split across multiple lines if the remote file contains multiple URLs Remote files can be loaded by the "Remote Load" feature. & Press Ctrl-L to invoke this feature. For the macro 2edc1e01e8

JEdit

jEdit is a powerful text editor for programmers. The program has been designed with simplicity in mind and so it is a rather small application. The tool is easily scalable, so it can handle enormous amounts of data. It has been engineered to be an all-purpose text editor for programmers. jEdit supports a myriad of edit modes, syntax highlighting, automatic indentation, extensive search and replace and regular expression support. A powerful plug-in manager is included. Its main window consists of a text editing area. The program is compatible with numerous operating systems. It is freeware. License: Free Software. Copyright: This product includes code written by a number of individuals, and their copyright notices and license terms are included in the file "AUTHOR.txt". Publisher's Description: ePlato is a visual programming IDE that allows you to make software fast, elegant and fun. Create object oriented or classical desktop applications. Get ready to make your code - there is no programming language! ePlato is a visual programming IDE that allows you to make software fast, elegant and fun. Create object oriented or classical desktop applications. Get ready to make your code - there is no programming language! ePlato offers an easy, visually intuitive, coding environment. Create your programs in minutes, not weeks or months. Make your own visual programming language. Create your own visual programming language. Your programs run under the Java Virtual Machine. Implement your own functions. Implement your own functions. Use an Object Oriented or Classical Programming style. Create your own GUI with ePlato Graphics. Build your own GUI with ePlato Graphics. Create your own interface. Create your own interface. Make your ePlato programs look as good as your website. Make your ePlato programs look as good as your website. Create your own data structures. Create your own data structures. Visual object oriented programming. Visual object oriented programming. Create your own fields and objects. Create your own fields and objects. Allow your program to talk to the outside world. Allow your program to talk to the outside world. Create your own Actions. Create your own Actions. Write your own plug-ins. Write your own plug-ins. Eliminate Visual Studio bloat. Eliminate Visual Studio bloat. Cons No cons to this application. Summary: If you're looking for a
