center of attention. Unfortunately, the advent of social media also marks the death of the usage of the word “professional” to describe the caliber of a graphic designer. When we see a profile of a graphic designer, we should look at whether or not that person has a LinkedIn account. This indicates that they are connected to the web of professionals only. These days, in the digital age, we should also look at whether or not a graphic designer has a Facebook account. If they don't have a Facebook account, we can safely assume that they aren't connected to the web of professionals either. The best thing to do is to check out their social media accounts and really see if they are just tweeting or sharing graphic design content.
