Abdominal pain, early post-operative diarrhoea, skin mottling and elevated serum alkaline phosphatase levels are the main clinical features. We report a case of a middle-aged woman with ischaemic colitis following bladder neck suspension. Despite a favourable outcome she developed a severe chronic lower bowel obstruction and had to undergo a right hemicolectomy. It is important for the surgeon to be aware of this potential complication and may affect long-term bowel function if left untreated.Q: How to promote a REST web service to REST API I'm designing a REST service. It's currently based on a WS and to support the future needs, I will have to add RPC as well. Today I need to add REST features to an existing system, where RPC would be the only thing in place. RPC is used for some dedicated clients, but RPC consumes a lot of bandwidth and is not user friendly. I don't need to expose RPC/REST for the rest of the system to use and is not user friendly as well. Should I change the design to a REST API as well, should I have to? A: There is no precise meaning for the words RPC and REST. If you need to represent the transfer of state from one point to another to use a plain old RPC then you would have to change the RPC to work in a RESTful way. So you can keep the RPC interface and change the calling server to treat the request as a JSON document rather than a collection of values. Some people prefer using RPC style interfaces to web services, but personally I prefer REST. Back to Earth (Crass album) Back to Earth is the seventh studio album by Crass, released in
