Adobe Photoshop CS3 allows you to browse the folders you are using, but you cannot create new folders. So, if you want to create a folder on your hard drive, you'll have to turn over control to Photoshop CS3 and let it do the job. There's no way to drag and drop sites into folders. You can't drag and drop items to create folders or move things around. It is a rather annoying feature. Adobe Photoshop has recently launched a new version (not the version 20.0) called Photoshop CS3. This new user-friendly version is light in weight and easy to use.
